

**Grant Assistance for Grass-Roots Human Security Project
Handing Over Ceremony for
The Project for the Improvement of Emergency Response Transportation
at Mandeville Regional Hospital**

A new ambulance was handed over to Mandeville Regional Hospital at the Ministry of Health and Wellness for “the Project for the Improvement of Emergency Response Transportation at Mandeville Regional Hospital” on November 1, 2021.

The Mandeville Regional Hospital is a designated regional hospital and due to the surging number of COVID-19 patients, improvement of emergency response capabilities was an immediate need at the hospital. Procuring the new ambulance through this project will ameliorate response abilities for a state of emergency including measures against COVID-19 virus as well as the medical system in the region.

The Hon. Christopher Tufton, the Minister of Health and Wellness, Mr. Alwyn Miller, the Chief Executive Officer of the hospital attended the ceremony and expressed their expectation for the improvement of the medical system in the region.
